## ABOUT US

A summer working at Summit is fulfilling, challenging, and for many, a defining moment of early adulthood. Working and living in an environment where you serve to help youth that have struggled to find acceptance is both amazingly rewarding and intensely difficult at times. Your own personal development- the ability to demonstrate resilience, professionalism, and endurance- will be tested in entirely new ways.

## HIRING

- TBD

Staff members must be also be emotionally stable, mature, objective, accepting of individual differences, yet warm and supportive. We like counselors to have 1 year of college and experience with children. Experience with special needs populations and/or challenging children is valuable. Summit Camp is not a match for a person looking for their first experience working with children.
